PROFESSIONAL SUMMARY

Junior full-stack software developer trained at Moringa School, with professional backend experience at Fundbridge Ltd and hands-on experience building and deploying web applications using Next.js, React, TypeScript, Django and FastAPI. Experienced in payment integrations (M-Pesa, Airtel Money), authentication, REST APIs, PostgreSQL databases and AI-powered features such as Retrieval-Augmented Generation (RAG). Seeking a software engineering role in a progressive, competitive environment where I can apply and grow my skills.

TECHNICAL SKILLS

Frontend: HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React.js, Next.js

Backend: Python, Flask, Django, Django REST Framework, FastAPI, REST APIs, JWT authentication

Databases & Storage: PostgreSQL, Neon, pgvector, SQLAlchemy, Alembic, Supabase Storage, Cloudflare R2

AI: AI agents, Retrieval-Augmented Generation (RAG), embeddings, vector search, Gemini, Ollama

Integrations & Tools: M-Pesa, Airtel Money, Clerk authentication, Resend, WhatsApp, Git/GitHub, Vercel

PROJECTS

MCM-CARGO – Logistics & Cargo Management Platform

GitHub: github.com/Elizabeth-NN/mcm | Live: mcm-amber.vercel.app

Digital logistics platform for a Kenya-based clearing and forwarding business, bringing enquiries, quotations, payments, shipment tracking and admin into one workflow.

- Built customer accounts and authentication, services catalogue, quote requests, shipment management and shipment tracking
- Implemented document management, customer notifications and admin workflows
- Integrated M-Pesa and Airtel Money payments; delivered a responsive, SEO-configured public website

Tech stack: Django REST Framework, PostgreSQL, Clerk, Resend, Supabase Storage, Next.js, TypeScript, Tailwind CSS

Customer Support Agent – AI Customer Support Platform (RAG)

GitHub: github.com/Elizabeth-NN/customer-support-agent | Live: customer-support-agent-jade-two.vercel.app

AI-powered SaaS support platform that answers customer questions from a business's own knowledge base and escalates requests the AI cannot safely resolve.

- Built knowledge ingestion pipeline: document processing, chunking, embeddings and vector retrieval with pgvector
- Generated source-grounded answers with source attribution and retrieval evaluation
- Developed public chat widget, conversation and support-ticket management, controlled tools for order workflows and human escalation
- Added business settings dashboard, request IDs and privacy-conscious logging

Tech stack: Next.js, React, TypeScript, Tailwind CSS, FastAPI, Clerk, Neon PostgreSQL, pgvector, Cloudflare R2, Alembic, Gemini embeddings, Ollama

AlexCyberServices – Digital Services Web Application

GitHub: github.com/Elizabeth-NN/cafe

Full-stack self-service platform for a Kenyan digital-services business, with an authenticated admin system.

- Built customer accounts, services catalogue, service request workflow and order management
- Integrated M-Pesa payments and WhatsApp; implemented document management and customer notifications
- Developed admin dashboard for services, categories, customers, orders, payments, documents and blog content

Tech stack: FastAPI, PostgreSQL, SQLAlchemy, Pydantic, Clerk, Supabase Storage, Next.js, TypeScript, Tailwind CSS

Moringa Innovation Marketplace – Assistant Team Lead

GitHub: github.com/I-GIKARU/Innovation-Marketplace

Web platform enabling Moringa School students to showcase, monetize and scale capstone projects, and external users to discover talent and buy solutions and Moringa-branded merchandise.

- Assisted the team lead by allocating tasks to team members
- Designed and implemented the backend database schema
- Built the client dashboard on the frontend using React.js

Tech stack: React.js (frontend), database schema design (backend)

EDUCATION

Moringa School — Software Engineering | Feb 2025 – Aug 2025

Strathmore University — Bachelor of Computer Science | Deferred

Starehe Girls Centre, Nairobi — KCSE, Grade B+ | 2014 – 2017

Full scholarship recipient

Kaganjo Primary School, Murang'a — KCPE, Grade A | 2005 – 2013

WORK EXPERIENCE

Backend Developer — Fundbridge Ltd | Oct 2025 – Mar 2026

- Developed and maintained REST APIs using Flask and the Flask REST framework
- Implemented JWT-based authentication and secured API endpoints

Trainee Accountant — Leomart Distributors Limited | Jun 2019 – Dec 2019

- Created and regularly updated customer statements of account
- Performed reconciliation analysis
- Prepared management reports
- Coordinated submission of sales staff reports

Teacher — St. Monica Glorious Primary School | Jan 2018 – Jul 2018

- Taught Computer Studies and Mathematics to primary school pupils
- Set and administered tests and exams
- Mentored pupils

REFEREES

Technical Mentor: sam@tomash.dev | samtomashkayembi@yahoo.fr
